CLAIM AMENDMENTS

Claim Amendment Summary

Claims pending

• Before this Amendment: Claims 1, 3-7, 9-11, 13-23, and 25-41.

• After this Amendment: Claims 1, 3-7, 9-11, 13-23, 25-27, 30-35,

and 38-41.

Non-Elected, Canceled, or Withdrawn claims: 2, 8, 12, 24, 28-29, and 36-37.

Amended claims: 1, 17, 23, 30-33, 38, and 39.

New claims: None.

Claims:

1. (Currently amended) A method comprising:

monitoring players in a game, wherein the game is monitored only on a game

server:

based on said monitoring, identifying one or more player-exploitable game

conditions, wherein the player-exploitable game conditions are programming conditions.

situations, or aberrations produced within the game that give one or more cheating

players an advantage without the cheating players backing the game, and are identified by

observing the players' play of the game:

setting a threshold against which the play of the players is compared, wherein the

threshold is set based on a rate at which virtual property is acquired during the play and

wherein the threshold is configured to be modified in real time; and

identifying, among the players, one or more cheating players who are exploiting the player-exploitable game conditions, the identifying comprising comparing the rates at which the cheating players acquire the virtual property in the game against the threshold, whereby the cheating players and player-exploitable game conditions are dealt with to prevent from further occurrence.

- 2. (Cancelled).
- 3. (Original) The method of claim 1, wherein the monitoring is automatic.
- 4. (Previously presented) The method of claim 1, wherein the monitoring checks for the cheating player.
- 5. (Original) The method of claim 1, further comprising logging players who are suspected of cheating.
- **6. (Original)** The method of claim 1, wherein the player-exploitable game condition allows one player to exploit the player-exploitable game condition for an advantage against other players.
- 7. (Original) The method of claim 1, wherein a cheater detection portion performs the monitoring.

Serial No.: 10/633,816 Atty Docket No.: MS1-1626US Atty/Agent: Ningning Xu RESPONSE TO FINAL OFFICE ACTION

8. (Cancelled).

9. (Previously presented) The method of claim 1, further comprising

sending a notice to the cheating player.

10. (Previously presented) The method of claim 1, further comprising

terminating the cheating player's privileges for a prescribed duration.

11. (Previously presented) The method of claim 1, further comprising

sending a notice to players other than the cheating player describing the activities of the

cheating player.

12. (Cancelled).

13. (Previously presented) The method of claim 1, wherein the play of

players whose play exceeds the threshold is logged.

14. (Original) The method of claim 1, wherein the player-exploitable game

condition includes positioning the player at some location other than a ground plane

15. (Original) The method of claim 1, wherein the player-exploitable game

condition includes rollover of a player's score.

16. (Original) The method of claim 1, wherein the player-exploitable game

condition includes rollover of a player's expense.

17. (Currently amended) An apparatus implemented at least in part by a

computing device comprising:

a processor;

one or more computer readable media; and

a computer program encoding a game including a cheater detection portion that

identifies one or more player-exploitable game conditions and detects players who are

exploiting at least one of said player-exploitable game conditions, the player-exploitable

game conditions being programming conditions, situations, or aberrations produced

within a game that give the players an advantage without the players hacking the game.

wherein the cheater detection portion further sets a threshold against which the play of a

number of players is compared, wherein the threshold is set based on the rate at which

virtual property is acquired and can be modified in real time, and wherein the cheater

detection portion detects the players who are exploiting at least one of said player-

exploitable game conditions by identifying the players whose rate exceeds the threshold.

18. (Original) The apparatus of claim 17, wherein the cheater detection

portion includes a game monitor process.

19. (Original) The apparatus of claim 17, wherein the cheater detection

portion includes an asynchronous activity pump.

20. (Previously presented) The apparatus of claim 17, wherein the cheater

detection portion includes criteria based logging portion for logging a player's activity.

21. (Original) The apparatus of claim 17, wherein the cheater detection

portion is included as a portion of a network.

22. (Original) The apparatus of claim 17, wherein the cheater detection

portion is included as a portion of a stand-alone computer system.

23. (Currently amended) A method comprising:

setting a threshold for a game, wherein the threshold is set based on the-a rate at

which virtual property is acquired and the threshold can be modified in real time;

monitoring play of a plurality of players for the game one or more player-

exploitable game conditions, wherein the play is monitored only on a game server, and

wherein the one or more player-exploitable game conditions comprise at least a rollover

situation or a dupping situation in which one or more cheating players take an unfair

advantage by exploiting such situation without hacking the game;

determining whether the threshold is exceeded for any of the players of the game;

logging the play of the player whose play exceeds the threshold to a computer

storage media; and

identifying the one or more cheating players who exploit the player-exploitable

game conditions and whose play exceeds the threshold for the game based at least in part

on the logged play, whereby the cheating players are dealt with to prevent from further

occurrence.

24. (Cancelled).

25. (Previously presented) The method of claim 23, further comprising

changing the threshold when the game is being played.

26. (Original) The method of claim 23, wherein the threshold can be reset.

27. (Original) The method of claim 23, wherein the determining whether the

threshold is exceeded is based on the rate at which a particular player is acquiring virtual

property.

28-29. (Cancelled).

30. (Currently amended) The method of claim 23, further comprising

punishing the one or more cheating players, wherein the cheating players are one or more

players whose play exceeds the threshold for the game.

31. (Currently amended) The method of claim 23, further comprising

modifying the game based on the one or more cheating players, wherein the cheating

players-are one-or-more players who exceed the threshold for the game.

32. (Currently amended) A computer readable medium having computer

executable instructions that, when executed by a processor, causes the processor to

perform a method, the method comprising:

[[set]] setting a threshold for a game, wherein the threshold is set based on the rate

at which virtual property is acquired and the threshold can be modified in real time;

monitor monitoring play of a plurality of players for the game one or more player-

exploitable game conditions, wherein the play is monitored only on a game server, and

wherein the one or more player-exploitable game conditions comprise at least a rollover

situation_or_a dupping situation in which one or more cheating players take an unfair

advantage by exploiting such situation without hacking the game; and

determine determining whether the threshold is exceeded for any of the players of

the game.

33. (Currently amended) The readable medium computer computer executable instructions of claim 32, wherein the method further comprises further comprising determining whether the player is cheating based on logging the play of the player whose play exceeds the threshold.

34. (Original) The computer readable medium having computer executable

instructions of claim 32, wherein the threshold can be reset.

35. The computer readable medium having computer executable

instructions of claim 32, wherein the determining whether the threshold is exceeded is

based on the rate at which a particular player is acquiring virtual property.

36-37. (Cancelled).

38. (Currently Amended) The computer readable medium

computer executable instructions of claim 32, wherein the method further comprises

further comprising punishing cheating players, wherein the cheating players are one or

more players who exceed the threshold for the game.

39. (Currently Amended) The computer readable medium having

computer executable instructions of claim 32, wherein the method further comprises
